

### **Profit Warning 1st Quarter 2016**

The Turnover in the First Quarter of 2016 is at approximately the same levels as in the corresponding quarter of 2015. Despite the decrease in the Operating Profit due to decreased gross profit margins, as a result of the proportional increase of sales in the Distribution Sector where gross profit margins are lower, Profit after Tax remains at around the same levels, mainly due to the positive impact of the exchange rate between the US Dollar and the Euro.
