ANNOUNCEMENT

Revised Industry Classification Benchmark for listed companies

As of September 2006, the Cyprus Stock Exchange (CSE) has adopted and follows the FTSE-Russell international Industry Classification Benchmark (ICB) for the classification of listed companies in sectors of economic activity.

The benchmark is an internationally recognised standard for the identification of the business activity of companies, used by foreign stock exchanges as well as the international investment community to carry out investments in specific sectors of the economy.

Companies are classified in four levels (Industry, Super Sector, Sector and Sub Sector) and each company is classified in the level that best reflects its economic activity. The classification is based on the determination of a company's main source of income, in accordance with its annual report, its prospectus and other publicly available information, as defined in the ICB standard.

Taking into consideration the changes occurring in recent years in the sectors of economic activity and following a relevant consultation with market participants, FTSE Russell has revised the company classification system (Industry Classification Benchmark - ICB) which it uses to classify companies in order to reflect changing market needs. Moreover, the revision harmonises the two distinct classification systems of the Russell Global Sectors (RGS) with the new ICB. The new ICB standard is available on the FTSE-Russell website, at the following link:

https://research.ftserussell.com/products/downloads/ICB_Rules_new.pdf?_ga=2.84307920.870892711.1575625533-869702666.1547116060

More specifically, the benchmark has been improved and extended to include:

- 11 Industries (instead of 10) at the 1st level
- 20 Super Sectors (instead of 19) at the 2nd level
- 45 Sectors (instead of 41) at the 3rd level
- 173 Sub Sectors (instead of 114) at the 4th level.

The most important changes of the classification system are summarised as follows:

- The advancement of “Real Estate” from Super Sector to Industry
- The establishment of the “Consumer Discretionary” and “Consumer Staples” Industries
- The extension of the “Telecommunications” Industry
- The renaming of the “Oil & Gas” Industry to “Energy”.

The changes in the structure of the ICB will result in changes in the classification of companies trading on the CSE Securities Markets. The new classification of listed companies in accordance with the new ICB standard is attached herewith. The changes will take effect on Thursday, 12 December 2019.

Nicosia, Tuesday 10 December 2019
