

Preliminary estimates for the results of the first half of 2020

29 June 2020

Petrolina (Holdings) Public Ltd notes that, based on the financial results available to date, profits for the first half of 2020 are expected to be decreased compared to the results of the corresponding first half of 2019 and compared to the profits of the previous year. The main reason of the decreased profits compared to those of last year is the impact of the Covid-19 pandemic and the reduced demand for petroleum products during the period of prohibition of circulation up to this day, especially to the Group's associated companies active in the aircraft refuelling sector.
